A course of lectures is given by the students during the winter months in Whitehill, which are much appreciated. A singing class is also conducted at Whitehill each week. He jumped at it, like a cock at a grossart.  
He hasna as muckle sense as a cow could haud in her faulded nieve.  
The deil and the dean begin wi' ae letter; when the deil gets the dean the kirk will be better.

He's a fool that forgets himself.  
The drucken sot gets aye the drucken groat.  
The dorty dame may fall in the dirt.  
He has a saw for a' sairs.  
He's auld and cauld, and ill to lie beside.  
The deil bides his time.

After dinner sit a while, after supper walk a mile.  
If marriages are made in heaven, you two hae few friends there.  
A pound o' woo is as heavy as a pound o' lead.

Gie him a hole, and he'll find a pin.  
God send us siller, for they're little thought o' that want it.  
Hanging's sair on the cessigt.  
He harps aye on ae string.

He doesna aye ride when he saddles his horse.  
Hanging's sair on the cessigt.

"Gie her her will, or she'll burst," quo' the man when his wife kamed his head with the three-legged stool.  
Gie a greedy dog a muckle bane.  
Gardener's law—Eat your fill, but pouch nane.

Better be out o' the world than out o' fashion.  
 Every man's tale's gude till anither's tauld.  
 Cats and carlins sit i' the sun, but fair maidens sit within.  
 Feckless fools should keep canny tongues.

A toom purse makes a thraven face.  
 Fish guts an' stinkin' herrin' are bread and milk for an Eyemouth bairn.  
 Claw for claw, as Conan said to the deil.  
 Far frae my heart's my husband's mother.

A' ae oo', a' ae price. A bald head is sune shaved.  
If we canna preach in the kirk, we can sing mass in the quire.  
If it winna be a gude shoe we'll mak a bauchel o't.

Fresh fish and unwelcome friends stink before they're three days auld.  
Better a saft road than bad company. Fortune helps the hardy.

What ye do when you're drunk ye may pay for when you're dry.  
Nae thing sae crouse as a new wash'd louse. When a' men speak, nae man hears.  
It's a dry tale that disna end in a drink.

Lang-tongued wives gang lang wi' bairn.  
I hae seen mair than I hae eaten, else ye wadna be here.  
Gie a beggar a bed, and he'll pay you wi' a louse.

There was ne'er a thrifty wife wi' a clout about her head.  
The wife's aye welcome that comes wi' a crooked outer.  
Wonder at your auld shoon when ye hae gotten your new.  
We are aye tae learn as lang as we live.

Ne'er kiss a man's wife, or dight his knife, for he'll do baith after you. Ower muckle cookery spoils the brochan.  
 Pleading at the law is like fighting through a whin bush—the harder the blows the sairer the scarts.

FEBRUARY.—Dig and trench vacant ground, and prepare especially such ground as may be required for early crops. Choose southwardly exposed or sheltered situations for peas, beans, &c., and continue to sow them in favourable weather. Cut early kidney potatoes for seed, and start their growth by placing them in hot-beds. Care must be taken properly to protect and train cucumbers and melons. Asparagus to be forced. Mushroom beds may be formed, and the old ones carefully defended. In the beginning, or at any time during this month, you may make a hot-bed for early kidney beans. Sow the different kinds of small salading, such as cresses, mustard, radish, and lettuce, once a week, if the weather be open. Cauliflower plants, in frames, should have the free air every mild day, by taking the glasses entirely off. Cauliflower seed may be sown. Early cabbage, if strong in growth, should now be transplanted. Late cabbage may be sown.

They were scant o' bairns that brought you up. Pennyless souls may pine in purgatory. Penny wise and pound foolish. Nearer the bone, sweeter the flesh.  
 Ne'er marry a pennyless maiden that's proud o' her pedigree.

If ae sheep loup the dyke, a' the rest will follow.  
His room's better than his company. His geese are a' swans.  
If a man's gann down the brae ilka ane gies him a jundie.

MARCH.—Attend to the state of what has been planted in the two previous months. Transplant cauliflower into rich ground. Sow brocoli for early crops. Transplant cabbages of all kinds into the place where they are to remain. Transplant and sow lettuce; sow savoy; sow spinage to succeed that formerly sown; repeat the sowing once a fortnight; sow onions and leeks; keep up the supply of radishes; sow turnips, carrots, and parsnips; sow mint, garlic, scallions, &c. Plant early potatoes in open weather. Transplant sweet herbs intended for kitchen use. Plant young strawberries, and dress strawberry beds. Graft apples, pears, &c.

APRIL.—Let the cucumber and melon hot-beds, which were made a month or two ago, be examined, in case they should not have attained the proper heat. Sow these plants early in the month; transplant lettuces; thin radishes; sow round radishes and spinage; plant out full crops of cabbages and savoys; still sow onions and leeks. Sow spinage for a succession crop in May and June; it will yet succeed. Where a constant supply of the plant is required, they ought to be sown once a fortnight, as they soon run into seed. Beet, if omitted previously, may still be sown. Plant slips and cuttings of kitchen herbs, but take care not to give too much water to thyme. Finish the grafting of all trees this month. Plant strawberries in edgings; add climbing plants of all kinds. Begin the hoe culture of killing weeds wherever practicable.

MAY.—Plant out cucumbers under hand-glasses. Plant now a full crop of kidney beans to succeed those of last month; and in wet days put in the principal crop of runners. Asparagus ought to be fit this month to be cut for use. In moist weather transplant such lettuces as were sown the two former months. Keep clean the beds of turnips, carrots, parsnips, onions, &c., and thin such as require it. Transplant spring sown cabbage and savoy for autumn use, also red cabbage. Plant out towards the middle or end of this month the gourds and pumpkins sown in April. Plant out tomatoes or love apples. Carrot seed may still be sown in succession; such as are sown in this month will be very acceptable.

"There's baith meat and music here," quo' the dog when he ate the piper's bag. "Because" is a woman's reason. There's nae friend like the penny. Better be envied than pitied. Bastard brood are aye proud.

A wise man carries his cloak in fair weather, an' a fool wants his in rain. There's measure in a' things, even in kail supping. Better be a coward than a corpse. Better a gude fame than a fine face.

He's blind that eats marrow, but far blinder that lets him.

He should be seldom angry that has few to mease him.

JUNE.—Supply well the cucumbers in frames with fresh air and water. Transplant celery into trenches, to remain to blanch. Sow a full crop of turnips for autumn use; transplant leeks; keep up the crops of peas and beans; plant cabbages for use in autumn and winter; gather mint and other aromatic herbs for drying towards the end of the month. Transplant leeks, which in general will be of a proper size for this purpose, towards the middle or end of this month. Let a quantity of the brocoli plants, which were raised in March or April, be planted, finally to remain in rows two feet asunder. Transplant endive. Thin young wall fruit when required. Plant out seedling flowers, and cuttings of wallflowers, carnations, &c. Top peas and beans to assist the filling of the pods.

JULY.—Prepare ground for the autumn and winter crops. Plant your principal crops of savoys and winter cabbages. Transplant broccoli, and sow seed for a late spring crop. Plant late crops of kidney beans. Sow onions to stand the winter, but this not before the end of the month. About the middle of the month you may sow some carrots, which will come into use at Michaelmas, and continue good till the spring; the same remarks apply to turnips. Thin, transplant, and sow lettuces, winter spinach, and several kinds of radishes, particularly the turnip rooted. As celery is a water plant, and requires to grow quick, it should be kept alive by wet. Lift all winter onions that are full grown, and prepare mushroom spawn.

Ae man's meat is anither man's poison. A light purse maks a heavy heart. An ill plea should be weel pled. If ye're nae better, ye're snoder like, quo the wife, when she cut off the doggie's lugs.

The gravest fish is an oyster; the gravest bird's an ool; the gravest beast's an ass; and the gravest man's a fool. Wad ye gar us trow that the mune's made o' green cheese, or that spade shafts bear plooms?

AUGUST.—Sow early and other cabbage seed to produce plants for the service of next summer; sow also red cabbage, and Dutch and cabbage lettuces on warm borders, for winter use; finish planting savoys; continue to sow onions, carrots, radishes, and cauliflowers; transplant celery into the trenches for blanching; continue to sow in succession several sorts of small salad seeds, such as mustard and cresses. If your cucumbers in the open ground stunt, curl, or canker, lay little bits of new tile under them. Gather herbs for distillation, such as the mints, penny-royal, &c. Plant lavender, rosemary, sage, hyssop, and other aromatic herbs. Take particular care now of ripening melons, and in dry weather give the advancing crops water.

If you would be a merchant fine, beware o' anld horses, herring, and wine. Dinna gut your fish till ye get them. If ye had as little money as ye hae manners, ye would be the poorest man o' a' your kin.

SEPTEMBER.—This is the season for providing mushroom spawn, and dung for the mushroom beds. The spawn is found chiefly in dry old rotten dunghills; it is a white fibrous substance spreading in the dung. The spawn must be kept from wet. Plant lettuces in frames for winter use; transplant cauliflowers. The young cabbage plants which were sown the first or second week of August for an early crop next summer and autumn should be planted into nursery beds. Continue to plant celery in trenches, and earth up the plants as they advance. Continue to gather seeds. Cardoons, which will now have made considerable progress, must be earthed up for blanching, their leaves being previously tied up carefully and regularly. Cover asparagus with manure. Plant cuttings of gooseberries, currants, raspberries, and strawberries. Remove hardy evergreens, shrubs, &c

OCTOBER.—Towards the end of this month, you may plant beans for an early crop the succeeding summer. The Mazagan bean will stand the winter best. Transplant lettuces for the winter service. Towards the end of this month plant some of the strongest cabbages in the place where they are to remain for early use next summer. Plant out early in this month any aromatic plants wanted, such as thyme, hyssop, sage, &c. Earth up celery on dry days. Clean water spinach. Collect and preserve flower seeds, and transplant rooted cuttings and layers. Dress wall trees and standards; and remove green-house plants to their winter shelter.

A willful man maun hae his way. A wise lawyer ne'er gangs to law himsel. Better a sma' fish than an empty dish. He kens muckle wha kens when to speak, but far mair wha kens when to haud his tongue.

A dog's life—muckle ease, muckle hunger. A twalpenny cat may look at a king. A vaunter and a liar are near akin. Gang farther and fare waur. Gie him an inch, and he'll tak an ell. Gude gear gangs into little pouk.

Beauty is but skin deep. Beggars shouldna be choosers.  
A sca'ded cat dreads cauld water. A's fish that comes to the net.  
Better bend than break. Better buy than borrow.

NOVEMBER.—Get everything out of the land this month which is not intended to stand during the winter. In the middle, or towards the end of this month, is a proper season to plant early beans, to succeed such as may have been planted in October. The same direction may be applied to peas. Broccoli may be laid down, and their heads pointed to the north, especially the high growing kinds. Where the asparagus beds were not cleaned and earthed during the last month, it must now be done. Artichokes should now receive their winter dressing. The beginning of this month you should take up carrots and other roots to be preserved in sand, &c., for the use of the kitchen during the winter months. After the middle, or towards the latter end of this month, according to the state of the weather, will be the time to put fires in the hot-houses, particularly in the evenings.

As gude fish in the sea as e'er cam out o't. A short grace is gude for hungry folk. A tale never times in the telling. He that has a dog at hame may gang to the kirk wi' a clean breast. He's as welcome as snaw in hairst.

Fools mak feasts and wise men eat them. Gude health is better than wealth. He puts his meat in an ill skin. He's a fool that marries at Yule; for when the bairn's to bear the corn's to shear.

DECEMBER.—Remove decayed leaves from the cauliflower plants, and let the plants have free air during the day. If the weather be dry and open, radishes and carrots, for an early crop, may be sown. Keep up the succession of peas; the kind called hotspur is one of the best for this season. Plant beans now, if you have not planted them earlier. Attend carefully to have the mushroom beds defended from frost and wet. Take advantage of the first day, if not frosty, to earth up such of the celery as may be in a fit state for it; and see that the plants are pretty dry before you begin earthing. Carefully examine fruit which has been laid up in the house.

THE island of Iona, or Icolmkill, is situated near the south-west of Mull, and is about three miles long by one mile broad. It was here that St. Columba, a Christian missionary from Ireland, came to live in the year 563. St. Columba and his disciples were called Culdees. They were a species of religious recluses, who lived in retired places, and this may have been the reason why they came to Iona. At St. Andrews, Dunkeld, Dunblane, and Brechin there were convents of Culdees from remote antiquity. They remained longest at Brechin, but no trace of them can be found after the 13th century. St. Columba lived a most exemplary and sanctified life, and died at the age of 77 in his disciples' arms. His grave is pointed out, but his relics are said to have been removed to Dunkeld. The Cathedral of St. Mary is built in the usual form of a cross, the length being 160 feet, and the breadth 24 feet. The Tower is supported by four arches resting on thick pillars. The high altar has disappeared, the only portion in existence being in the Andersonian Museum, Glasgow. The Nunnery of St. Mary was

erected at the close of the 12th century, and is in fairly good preservation. Within the church is the tomb of the order of St. Augustine. The straid na-marbh, or street of the dead, is close by, and is the burial place of Iona. Near this is Maclean's Cross, a beautiful example of the ornamental scrollwork of a bygone age. St. Martin's Cross is 14 feet high, made of one piece of red granite, and is considered to be a model of handsome proportions. It is said that previous to the Reformation there were about 360 crosses in the island, which have nearly all disappeared, having been thrown into the sea, by order of the Synod of Argyle, at the time of the Reformation. St. Oran's Chapel seems to be the most ancient building in Iona—having been erected about the end of the 11th century by the good Queen Margaret, wife of Malcolm Canmore, on the site of St. Columba's original cell. It is only 40 feet by 20, and is of Norman architecture. Both Staffa and Iona belong to his Grace the Duke of Argyll.

A bird in the hand's worth twa fleeing by.  
 Ye're a' blawin' like a burstin' haggis.

Ye wad clatter a cat to death.  
 Ye're sae keen o' clockin', ye'll dee on the eggs.

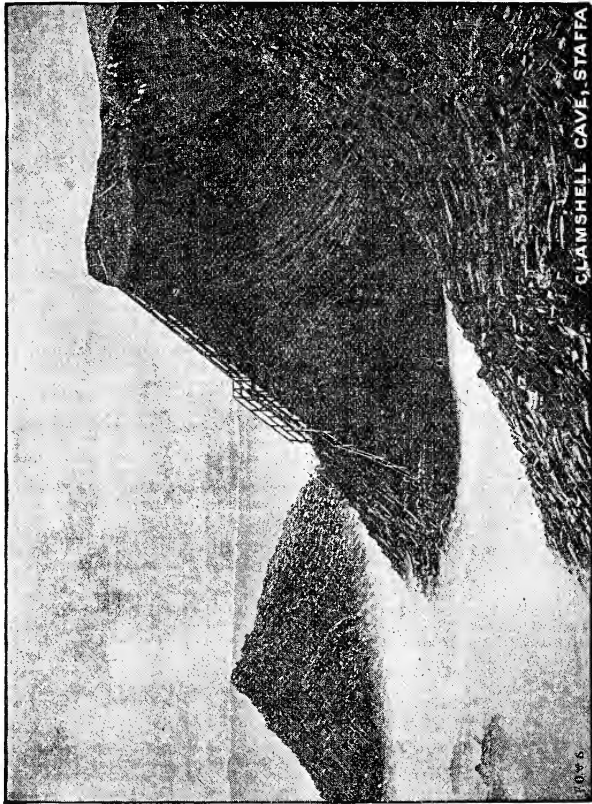

Ye hae been smelling the bung.

Your wit will ne'er worry you. A gien game was ne'er won. Your tongue wags like a lamb's tail.  
 A dish o' married love grows sune cauld. Ye're new come over—your heart's nipping.

**T**HE Clamshell Cave of Staffa, although not so famous as Fingal's Cave, has yet some features which the other caves have not. These consist in the columns being all bent in the shape of the ribs of a ship on the one side of the cave, while on the other side they present the top surfaces only, like the cells in a honeycomb. The curious basaltic formations all along the coast of Staffa, and which appear also in the Giant's Causeway in Ireland, are traced along the east coast of Skye in Loch Staffin, and will always be considered one of the most wonderful sights of the world.

The island of Staffa lies about 8 miles off

the Western Coast of Mull, and belongs, with Iona, to the Duke of Argyll. It is about 1½ miles in circumference, and the highest part is about 144 feet high. The columns are composed chemically of about one half flinty earth, one quarter iron, and one quarter clay and lime—they are of igneous formation, that is, formed by the perfect fusion of these ingredients into one mass, which in cooling has crystallized into regular forms, as starch will do on drying. This seems easily explained, but with all explanations, the cause why Nature produces such beautiful curiosities is still unrevealed.

CLAMSHELL CAVE, STAFFA

Dinna empty your ain mouth to fill other folk's.  
 Every dud bids another gude-day.    Dinna lee for want o' news.  
 Butter and burn trouts are kittle meat for maidens.

FEBRUARY.

The grace o' a grey bannock is in the bakin' o't.  
Like the wife wi' the mony dochters, the best's aye hindmost.  
Kissing is cried down since the shaking o' hands.

Tak a man by his word and a cow by her horn. After joy comes annoy. Ye didna lick your lips since ye leed last. Ye ne'er see green cheese but your een reels. Ye'll neither dance nor haud the candle.

She look'it at the moon, but lichtit i' the midden.  
Maidens' tochers and ministers' stipends are aye less than ca'd.  
She'll wear like a horseshoe, aye the langer the clearer.

Marriage wad tame the sea, if a match could be got for her.  
Love ower het soon cools.  
Malice is aye mindfu'.  
Keep your breath to cool your parritch.  
March dust and May sun mak corn white and maidens dun.

The back and the belly hands ilka are busy.  
My son's my son till he's got him a wife; my daughter's my daughter a' the days o' her life.  
Many hands makes light work.  
May-be's are no aye honey bees.

Better be before at a funeral than ahint at a bridal.  
Marry your son when you will, but your dochter when you can.  
The less wit a man has, the less he kens the want o't.

The biggest rogue cries loudest out. The Englishman greets, the Irishman sleeps, but the Scotchman gangs till he gets it.  
The bonny moon is on her back, men' your shoon and sort your thack.

That's the way to marry me, if ere you should hap to do it.

Better haud wi' the hounds than rin wi' the hare.  
 March dust and March win', bleaches as weel as simmer's sun.  
 Better marry ower the midden than ower the muir.

She brak her elbow at the kirk door.  
 The foot at the cradle and the hand at the reel, is a sign that a woman means to do weel.  
 Rowan-tree and red thread mak the witches tine their speed.

The fat sow's tail's aye creeshed.  
 The best that can happen to a poor man is that ae bairn dee and the rest follow.  
 The bird that can sing, an' winna sing, should be gar'd sing.  
 The best that can happen to a poor man is that ae bairn dee and the rest follow.

Ye'll follow him lang or he'll let five shillings fa.  
That's as ill as the ewes in the yaird and nae dogs to hunt them.  
Ye hae found a mare's nest, and laugh at the eggs.

Thank ye for the cakes, I have scones in my pocket. Ye hae a lang nose, and yet ye're cut lugget.  
Ye'll be hanged and I'll be harried. Ye're like me, and I'm nae sma drink.

Ye look as if butter wadna melt in your mou', but cheese will no choke ye. A fu' purse maks a haverin merchant.  
A dreigh drink is better than a dry sermon. Ye glower like a cat oot o' a whinbush.

It's an ill fight where he that wins has the warst o't.  
There's mirth among the kin when the howdie cries "A son."  
It's a staunch house that there's never a drap in.

Send your son to Ayr: if he do weel here, he'll do weel there.

RULE TO FIND THE WEIGHT OF CATTLE.

Take the girth behind the shoulder, and the length from the fore part of the shoulder blade along the back to the bone at the tail, which is in a vertical line with the buttock, both in feet. Multiply the square of the girth by 5 times its length, and divide by 21: the quotient is the weight, nearly, of the four quarters, in imperial stones of 14 lbs. avoirdupois.

# THE NEW PARLIAMENT

GIVING

## THE RESULTS OF THE SECOND GENERAL ELECTION UNDER THE REFORM ACTS OF 1884-85.

THE eleventh parliament of the reign of Queen Victoria assembled on the 12th of January, 1886, and was dissolved on the 26th of June of the same year, after an existence of only five months and fourteen days. The appeal to the constituencies was resolved upon in connection with Mr. Gladstone's Irish policy, and immediately followed the rejection of the second reading of the Home Rule Bill by a majority of 341 against 311 on the 7th of June.

The general election for the new parliament began on the 1st of July and ended on the 27th. It took place under the Reform Acts of 1884 and 1885, which dealt with representation and redistribution of seats, giving to householders and lodgers in counties the same franchises which were conferred upon the corresponding classes in boroughs by the Reform Act of 1867, and providing for a new division of the United Kingdom into county and borough constituencies.

By the legislation of 1884-85 the number of members of the House of Commons was increased from 652 to 670, and of the 18 new members thus created 6 were given to England and 12 to Scotland. In the following table we give a summary both of the House of Commons and the House of Lords:—

Mr. Gladstone and his colleagues tendered their resignations to Her Majesty on the 20th of June, and, on their acceptance, Lord Salisbury was entrusted with the formation of a new Ministry.

In the following pages we have first a complete list in alphabetical order of the constituencies of the three kingdoms with the respective members elected to Parliament; showing also the political party to which each member belongs, the number of votes polled in his favour, and the majority by which his return was secured. In the case of uncontested elections, the numbers are given polled by the successful candidate in the election of 1885. This is followed by an alphabetical list of members, succeeded in each case by the name of the place represented. In conclusion, we have given statistics regarding the balance of parties; a summary of the Session of 1886, and a table, showing the chief legislative measures passed for Ireland since 1801.

## THE PARLIAMENTARY SESSION: Jan.—June, 1886.

The 12th of January was the day appointed for the opening of the Session, but it was not till the 21st that the Speech from the Throne was delivered. During the course of the debate on the Address in the House of Commons, Mr. Jesse Collings moved an amendment censuring the omission of a pledge to promote the policy of "allotments and small holdings." This was supported by Mr. Gladstone, who defeated the Ministry by 329 against 258.

Lord Salisbury at once resigned, and Mr. Gladstone was called upon by the Queen to form an administration. The introduction of Mr. Gladstone's policy with regard to Ireland was delayed till the 8th of April, when he brought in a Bill to "amend the provision for the future government of Ireland," in the most crowded and excited House of Commons of which we have any record. A companion measure, the Land Purchase Bill, was brought in on the 13th of April. It was never, however, seriously discussed.

The debate on the Home Rule Bill was prolonged till the 7th of June, when it was rejected by a majority of 341 against 311.

Mr. Gladstone immediately asked for an adjournment, and it was announced without delay that all contentious business would be dropped and arrangements made for an immediate dissolution.

The most important Bills that became law during the short Session were the Crofters' Bill, the International and Colonial Copyright Bill, the Medical Acts Amendment Bill, the Shop Hours' Regulation Bill, and the Sale of Intoxicating Liquors to Children Bill. Parliament was prorogued on the 25th of June, and dissolved on the following day.

# THE CORPORATION OF THE Scottish Provident Institution,

6 ST. ANDREW SQUARE, 'EDINBURGH.

IN THIS INSTITUTION are combined the ADVANTAGES of

### MUTUAL ASSURANCE WITH MODERATE PREMIUMS.

The PREMIUMS are so moderate that at most ages an Assurance of £1200 or £1250 may be secured from the first for the same yearly payment which would elsewhere assure (with profits) £1000 only—the difference being equivalent to an immediate and certain Bonus of 20 to 25 per cent.

The WHOLE PROFITS go to the Policyholders, on a system at once safe and equitable—no share being given to those by whose early death there is a *loss* to the common fund.

The effect of *reserving* the surplus for the survivors (who will, however, comprise more than half the members) has been that—in addition to the above immediate advantage—the older Policies have already received reversionary Bonuses of 40 to 70 per cent. and upwards.

THE NEXT INVESTIGATION TAKES PLACE IN 1887.

### Examples of Premium for £100 at Death, with Profits.

AGE.	25	30*	35	40†	45	50
DURING LIFE, - - -	£1 18 0	£2 1 6	£2 6 10	£2 14 9	£3 5 9	£4 1 7
21 PAYMENTS, - - -	2 12 6	2 15 4	3 0 2	3 7 5	3 17 6	4 12 1

\* A person of 30 may secure £1000 at death by a yearly payment, *during life*, of £20:15s, which would generally elsewhere secure £800 only, instead of £1000. Or he may secure the same sum of £1000 by *twenty-one* yearly payments of £27:13:4, being thus free of payment after age 50.

† At age 40 the Premium *ceasing* at 60 is, for £1000, £38:14:2, being about the same as most Offices require during the whole term of life. Before that time the Policy will have *shared in at least one division of profits*.

The NEW BUSINESS has for many years exceeded a MILLION.

Expenses much under those of any office doing so large a new business.

The FUNDS (increased in year by £323,000) exceed £5,500,000.

Only two Offices in the Kingdom (both older) have as large a Fund.

*Claims payable on proper title One Month after proof of death, which is in most cases equivalent to immediate payment.*

REPORTS with Statements of Principles and Tables of Rates may be had on application.

### VALUABLE TESTIMONIAL.

From THOMAS HERD, Esq., Newport, Lincoln.

*(Winner of the First Prize for the best pen of Lincoln Sheep at the Lincoln Great April Fair, 1885.) May 2nd, 1885.*

Dear Sirs,—I have pleasure in testifying to the good qualities of the Glycerine Dip, which I have used for some time, and my sheep dipped with it obtained the Silver Prize Cup at our great Lincolnshire Sheep Fair this year. For general purposes and for wool growing I do not think it can be excelled.

## Produces Pure, Firm, and Sweet Butter at all Seasons.

**T**HIS inexpensive and valuable Powder produces Superior Butter at all Seasons, **Firmer, Sweeter, more Pure,** and in less time than without it, or with any other preparation. **It greatly increases the quantity, improves the quality,** and entirely removes all unpleasant flavour of Cake, Turnips, Mangolds, Dead Leaves, Wild Garlic, Leeks, Sour Grass, and Peaty Soils, from the Butter.

### BRINGS BUTTER IN A FEW MINUTES AT ALL SEASONS.

If one tablespoonful, dissolved in a little water, is put into two gallons of Milk when set for cream to rise, it will increase the quantity, and keep it sweet a longer time; and if changed will bring it back to its original sweetness. To makers of Whey Butter it is also most useful. Salt and Stale Butter is greatly improved by washing it in Cold Water in which some of the Powder has been dissolved.

*It is more economical to purchase the larger sizes, as a 1s. box contains about 3 at 6d.; a 2s. 6d. box more than 3 at 1s.; and other sizes in similar proportion.*
